

Stencil Rolls

- Used in SMT (surface mount technology) screen printing lines to keep stencil apertures clear of paste residue during the automatic screen printing process
- Prevents smearing, bridging, solder balls, and other problems associated with the stencil printing of solder paste
- Manufactured from a blend of polyester and cellulose fibers
- More paper per roll resulting in less down time, less changeover time, and less inventory required
- Exceptionally low lint levels
- Solvent resistant material results in increased absorption per square inch

Answer a few simple specifications and we can customize your process to eliminate paper waste and reduce cost while maintaining the quality of the wiping process.

1. Type of machine (Dek, Ekra, MPM, Panasonic, SMTech or Yamaha): _____
2. Core Length (IN) "A": _____
3. Core I.D. Inner Diameter (IN) "B": _____
4. Paper Width (IN) "C": _____
5. Core Material Type: Paper Plastic
6. Current Stencil Roll Part Number: _____

Date: _____
Contact Name: _____
Company Name: _____
Phone: _____ Email: _____
Ship-To Address: _____
City: _____ State: _____ Zip Code: _____
